GEARS

Our gears are manufactured from alloy steel bar stock for precision and stability. The consistency between the gear teeth is obtained with the latest technology CNC machining. We provide iron nitriding hardness which enables the gears to withstand severe shock and provides extended life for each part. We also offer keyless ring feeder locking devices on our gears which eliminates the need for keys.

If we do not have your part, our full staff engineering department can customize any part for you.

QUALITY.

With up-to-date technologies, we are able to manufacture high quality machine parts out of quality grade steels, alloys, aluminum, brass, stainless steel, plastics, and other mechanical types of metal.

RELIABILITY.

In order to always keep your machines running at their peak performance, we offer a 24-hour emergency service line in case of a breakdown.

EFFICIENT.

We redesign, engineer and manufacture any part with a rapid turn-around rate between the order placement and delivery time.
